PROFESSIONAL EXPERIENCE

TOMOSIA Co.,Ltd

Apr 2024 – Oct 2024

Project: Hananoya Chatbot

Position: Front-end Developer

- **Project Description:** The project aims to develop an intelligent chatbot capable of interacting with users, providing information, answering questions, and assisting users in various fields. The chatbot uses the OpenAI API to deliver natural and accurate responses.
- **Team size:** 4
- **Responsibilities:**
 - Implemented interface configuration modules for the chatbot, ensuring customizable and user-friendly features.
 - Designed and built the user interface (UI) for the chatbot, optimizing user experience when the chatbot was integrated into different pages.
 - Conducted testing and optimization of the interface to improve performance and interactive features of the chatbot.

Project: Premium matching app

Position: Front-end Developer

- **Project Description:** The online dating application aims to connect singles with shared interests and goals in love. The application provides a safe and enjoyable platform for users to seek serious relationships or friendships.
- **Team size:** 6
- **Responsibilities:**
 - Responsible for developing and managing the messaging functionality, ensuring smooth interaction and security for users.
 - Set up and optimized system settings options to allow users to customize their experience.
 - Used FCM along with Service Workers to develop the notification system, ensuring users do not miss notifications even when the browser is closed.
